Agenda for Interview Scheduled for 2/12/07 2:00 pm EST

Application No.: 09/971,720

1. Discuss the Examiner's position that updating the states of the registers in Beatty corresponds to performing a graphical operation on the web page for dynamic visualization of the graphical elements indicative of the underlying architecture system.

    a. Specifically, the Examiner's position that updating the registers in Beatty can be considered a dynamic *visualization* of the *graphical elements*.

2. Discuss the Examiner's position that updating the states corresponds to the feature wherein the dynamic visualization provides a graphical representation of collaborative interactions between architectural components of the underlying architecture of the software system.
